3 [SIGMOD challenges paper: database issues in telecommunications network management](#)

Ilsoo Ahn

 May 1994 **ACM SIGMOD Record , Proceedings of the 1994 ACM SIGMOD international conference on Management of data**, Volume 23 Issue 2

 Full text available: [pdf\(822.72 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

Various types of computer systems are used behind the scenes in many parts of the telecommunications network to ensure its efficient and trouble-free operation. These systems are large, complex, and expensive real-time computer systems that are mission critical, and contains a database engine as a critical component. These systems share some of common database issues with conventional applications, but they also exhibit rather unique characteristics that present challenging database issues. ...

4 [A connectionless approach to integrated network management](#)

Jairo A. Gutiérrez

 July 1998 **International Journal of Network Management**, Volume 8 Issue 4

 Full text available: [pdf\(67.46 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

As computer networks become more complex and more heterogeneous & often involving systems from multiple vendors&, the importance of integrated network management increases. This paper proposes a model to represent an integrated network management environment & INME&; combining the emerging Web&-based management standards with the proven&-and&-tried network management solutions promoted by the Internet Activities Board, and centred around the Simple

5 Service and network management in the OAMS open service architecture

Simon Znaty

July 1996 **ACM SIGCOMM Computer Communication Review**, Volume 26 Issue 3Full text available:  [pdf\(1.35 MB\)](#) Additional Information: [full citation](#), [abstract](#), [index terms](#)

New open service architectures are now emerging to ease service construction, management, testing, deployment, and operation, and to hide from the service designer the heterogeneity of the underlying technologies and the complexities introduced by distribution. These architectures should provide all the functionalities for call and connection management, and support management functional areas. To reach these objectives, information models must be defined which provide service and network repres ...

6 TED models for ATM internetworks

Kalyan Perumalla, Matthew Andrews, Sandeep Bhatt

March 1998 **ACM SIGMETRICS Performance Evaluation Review**, Volume 25 Issue 4Full text available:  [pdf\(768.18 KB\)](#) Additional Information: [full citation](#), [abstract](#), [index terms](#)

We describe our experiences designing and implementing a virtual PNNI network testbed. The network elements and signaling protocols modeled are consistent with the ATM Forum *PNNI* draft specifications. The models will serve as a high-fidelity testbed of the transport and network layers for simulation-based studies of the scalability and performance of PNNI protocols. Our models are written in the new network description language TeD which offers two advantages. First, the testbed d ...

9 The personal presence system—a wide area network resource for the real time composition of multipoint multimedia communications

D. Boyer, M. Lukacs

October 1994 **Proceedings of the second ACM international conference on Multimedia**Full text available:  [pdf\(927.58 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

The Personal Presence System (PPS) is an experimental prototype platform to support advanced Broadband applications including multimedia conferencing and distance learning. The PPS supports user presentation control of advanced network elements (multimedia bridges). The multimedia bridges are shared network resources which are designed for deployment in proximity to other switching and transcoding resources. The multimedia bridge provides for a single point of contact for each user so that ...

10 A virtual PNNI network testbed

Kalyan Perumalla, Matthew Andrews, Sandeep Bhatt

December 1997 **Proceedings of the 29th conference on Winter simulation**Full text available:  [pdf\(863.49 KB\)](#) Additional Information: [full citation](#), [references](#), [index terms](#)**11** Fast detection of communication patterns in distributed executions

Thomas Kunz, Michiel F. H. Seuren

November 1997 **Proceedings of the 1997 conference of the Centre for Advanced Studies on Collaborative research**Full text available:  [pdf\(4.21 MB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

Understanding distributed applications is a tedious and difficult task. Visualizations based on process-time diagrams are often used to obtain a better understanding of the execution of the application. The visualization tool we use is Poet, an event tracer developed at the University of Waterloo. However, these diagrams are often very complex and do not provide the user with the desired overview of the application. In our experience, such tools display repeated occurrences of non-trivial commun ...

12 Report of the International Workshop on Distributed Systems: operations & managementApril 1992 **ACM SIGCOMM Computer Communication Review**, Volume 22 Issue 2Full text available:  [pdf\(899.31 KB\)](#) Additional Information: [full citation](#), [index terms](#)**13** Introducing client/server technologies in information systems curricula

Abhijit Chaudhury, H. Raghav Rao

September 1997 **ACM SIGMIS Database**, Volume 28 Issue 4Full text available:  [pdf\(1.02 MB\)](#) Additional Information: [full citation](#), [abstract](#), [index terms](#)

One goal of information systems (IS) departments in business schools is to train IS professionals with the necessary technical skills to support the IS function in companies. This paper suggests that changes are needed for most current IS curricula to meet the technical requirements of the client/server (C/S) world of technologies. It is hoped that the ideas presented here will stimulate debate and discussions as to how this transition can be accomplished.

19 [Network management viewpoints: a new way of encompassing the network management complexity](#)

Simon Znaty, Jean Sclavos

July 1994 **ACM SIGCOMM Computer Communication Review**, Volume 24 Issue 3

Full text available:  [pdf\(1.58 MB\)](#)

Additional Information: [full citation](#), [abstract](#), [index terms](#)

This paper defines viewpoints in order to deal with the network management complexity. A network management viewpoint leads to the representation of a network management system with emphasis on a specific concern. Five viewpoints are identified, namely information, functional, communication, architectural and organizational. The network management standards provisions and lacks for every viewpoint are enhanced and some elements of solutions are presented. Then, these viewpoints are integrated an ...

Network administrators can facilitate managing large, complex networks by using diagramming solutions. This article describes and discusses a variety of tools that are available to aid the design process. © 1997 John Wiley & Sons, Ltd.

7 Ecxpert: exploiting event correlation in telecommunications

Yossi Nygate

September 1994 **ACM SIGAPP Applied Computing Review**, Volume 2 Issue 2

Full text available:  pdf(800.69 KB)

Additional Information: [full citation](#), [abstract](#), [index terms](#)

Today's competitive market place has forced the telecommunications industry to improve their service and reliability. One step that telecommunications companies have taken to reduce network failures is the installation of operations centers to collect data from network elements. These centers are staffed by network managers who monitor network activity by correlating alarms across various operational disciplines (switch, facility, traffic) and relating them to a common cause. Accurate analysis i ...

9 Problem-oriented object memory: customizing consistency

Anders Kristensen, Colin Low

October 1995 **ACM SIGPLAN Notices , Proceedings of the tenth annual conference on Object-oriented programming systems, languages, and applications**, Volume 30 Issue 10

Full text available:  pdf(1.58 MB)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

This paper presents the notion of problem-oriented object memory, and its realization in a distributed object-based programming system, *Penumbra*. This system allows location transparent object invocation, object migration and caching. Its distinguishing feature, however, is its support for problem-oriented object sharing. Problem-oriented object memory is an object model that allows exploitation of application specific semantics by relaxing strict consistency in favour of performance. Our w ...

10 Simulation modeling and analysis with INSIGHT (tutorial session): a tutorial

Stephen D. Roberts, Mary Ann Flanagan

12 Management of virtual private networks for integrated broadband communication

J. M. Schneider, T. Preuß, P. S. Nielsen

October 1993 **ACM SIGCOMM Computer Communication Review , Conference proceedings on Communications architectures, protocols and applications**, Volume 23 Issue 4

Full text available:  pdf(1.29 MB)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

Management of Virtual Private Networks (VPNs) is becoming an increasingly important issue in the context of integrated broadband communication (IBC). In the near future corporate customers may want to subscribe to broadband VPN services offered by globally operating service providers to replace most of their leased line services that are used today to build their corporate networks. The concepts historically known as characterizing VPNs, such as the concept of closed user groups, will still be v ...

13 Annotated bibliography on network management

Simon Znaty, Jean Sclavos

January 1994 **ACM SIGCOMM Computer Communication Review**, Volume 24 Issue 1

Full text available:  pdf(1.64 MB)

Additional Information: [full citation](#), [abstract](#), [index terms](#)

This annotated bibliography covers the various aspects of network management. It contains a list of papers being ordered according to the four network management models, namely, functional, architectural, informational and relational.

14 Simulation modeling and analysis with INSIGHT: a tutorial

Stephen D. Roberts, Mary Ann Flanagan

December 1988 **Proceedings of the 20th conference on Winter simulation**

Full text available:  pdf(1.26 MB)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

The INSIGHT simulation language describes systems in a quick, simple, and compact fashion using a network representation. This description can be entered and simulated using novel interactive facilities that free the user from learning specific syntax. Statistics summarizing the simulation are produced automatically, but can be greatly enhanced by various input models and output analysis mechanisms. Use of the language does not require programming and complex models use the descriptive feat ...

19 Testing and debugging: Using Hy[±] for network management and distributed debugging

Mariano P. Consens, Masum Z. Hasan, Alberto O. Mendelzon

October 1993 **Proceedings of the 1993 conference of the Centre for Advanced Studies on Collaborative research: software engineering - Volume 1**

Full text available:  [pdf\(1.68 MB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#)

A network manager managing a computer network or a programmer attempting to understand and debug a distributed program both must deal with large volumes of data. Visualization is widely believed to help in these and similar tasks. We contend that visualization is indeed useful, but only if accompanied of the following facilities: abstraction, filtering, and layout control. The Hy⁺ visualization system and GraphLog query language provide these facilities. They support not ...

20 Decentralised approaches for network management

Mohsen Kahani, H. W. Peter Beadle

July 1997 **ACM SIGCOMM Computer Communication Review**, Volume 27 Issue 3

Full text available:  [pdf\(1.04 MB\)](#) Additional Information: [full citation](#), [abstract](#), [index terms](#)

Centralised network management has shown inadequacy for efficient management of large heterogenous networks. As a result, several distributed approaches have been adapted to overcome the problem. This paper is a review of decentralised network management techniques and technologies. We explain distributed architectures for network management, and discuss some of the most important implemented distributed network management systems. A comparison is made between these approaches to show the pitfal ...
